

Basic Detail Report

Reticulated Bowl

Date

19th century or later

Primary Maker

Unknown Chinese Artist

Medium

White nephrite

Description

has green box, pair with 2009.48.300 This pair of pierced jade bowls with silver-gilt mounts are decorated with

several motifs. The flattened chrysanthemum from which crowns the piece is Chinese in origin, however the intricately carved flowers which meander just underneath it are distinctly Indian. At the top and centre of the piece is the Chinese character for longevity and lattice-type designs that represent coins. Acanthus leaves are carved into the body of the bowls. (S. Bernstein appraisal)

Dimensions

Height x Diameter: 3 11/16 x 3 15/16 in. (9.4 x 10 cm)
