

Basic Detail Report

Euplocamus Andersoni

Date

1870-1872

Primary Maker

Josef Wolf

Medium

Lithograph, hand colored

Description

Three Euplocamus Andersoni (Anderson's Pheasant) birds, with black underbody, red head, black crest, and back, wings, and tail that are black with white line patterning. One bird stands in the foreground on a rock surrounded by ferns, while two more birds stand in the distance, including one (female?) with brown plumage. From "A

Monograph of the Phasianidae or Family of Pheasants," by Daniel Giraud Elliot (1835-1915), New York: 1870-1872.

Dimensions

16 x 20 in. (40.6 x 50.8 cm)
